

WILD AND WONDERFUL WATER: INSIDE AND OUTSIDE THE CLASSROOM

JOIN US JULY 10-12!

From the smallest wetland to the largest lake, water holds a lot of exciting teaching opportunities!

Water flows through every ecosystem!

It aids with soil health, guides migration patterns, and affects everything in between.

Come with us on a 3-day comprehensive adventure and learn how water is so much more than wet!

Meet water and its many shapes and sizes in a hands-on, outdoor activity-based curriculum that you can incorporate into your own classroom.

2 SHs are available through Lake Erie College.

Participants will receive these curriculum guides full of interactive, inquiry-based, adaptable and fun activities:

Project WET

Project WILD

Project WILD Aquatic

July 10—Big River Day

Lake Metroparks Hidden Valley Park

4872 Klasen Rd., Madison Twp., OH 44057
